

# A new generation in polyurethane foam.

## FLows WHERE NO OTHER FOAM HAS GONE BEFORE

Fomo Products is *revolutionizing* polyurethane foam with our new High Flow Technology™. High Flow Technology is an *industry first* polyurethane foam category, taking traditional pour-in-place foams and adding the ability to flow great distances through intricate voids to completely fill complex cavities.

### Traditional Filling Materials vs. High Flow Technology

	Fiberglass	Dense Pack Cellulose	Standard SPF	Standard PIP Foams	Tripolymer Injection Foam	Polystyrene Beads	High Flow Technology
Flowability				✓	✓		✓
Resistance to Shrinkage			✓	✓			✓
Completely Fills/Seals				✓			✓
Non Settling			✓	✓			✓
Flows through Intricate, Complex Shapes							✓
Flows Great Distances							✓

PATENT PENDING

While other building materials can have settling or shrinking issues, High Flow Technology fully fills cavities or voids to completely air seal and insulate. Fomo's variety of products featuring High Flow Technology are non-settling and dimensionally stable, formulated for a wide variety of applications.

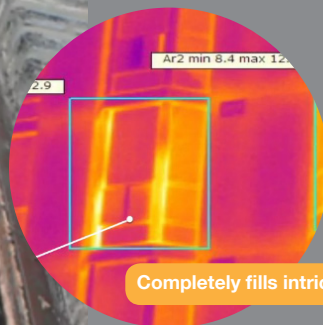

High Flow Technology delivers what other polyurethane foams can't, filling cavities more efficiently, more effectively and more completely than any other building material.

INDUSTRY FIRST TECHNOLOGY

BEYOND POUR-IN-PLACE

Completely fills intricate voids

IMPOSSIBLE APPLICATIONS NOW POSSIBLE
